Source : The Metropolitan Electricity Authority

Note : Number of electricity users mean the users with the installation of ampere meters and electric usage (excluding breaker meters). Due to no collection for payment from users on public electricity; therefore, the Metropolitan Electricity Authority has issued a policy to reduce recording expenses on public electric units by using the size of public light bulbs for the record instead of the ampere meters as the following calculation : size of public light bulb × number of light bulb × period of turning on and off. All ampere meters that have been used will be removed, and this will result in no longer information of the number of users on public electricity.

Temporary Electricity mean temporary electric usage for construction purposes, special events organized temporarily or temporary other purposes

CATEGORIES	NUMBER OF METERS (Case)	ELECTRICITY ENERGY SALES (GWh)
